Revolutionary Door Systems from The VEKA UK Group

The VEKA UK Group

Revolutionary Door Systems from The VEKA UK Group

Welcome to the pinnacle of PVC-U door technology – an uncompromising suite of folding, sliding doors that offers style, functionality, security and thermal performance in equal measure.

We dared to Imagine Doors done better.

Why do French Doors need that obtrusive central pillar? Who says Bi-Folding Doors have to take up lots of space? Why can't a Patio Door have a letterplate? We asked ourselves these questions and more, literally going back to the drawing board to deliver a truly pioneering family of new and upgraded designs.

The Imagine Doors' elegant and understated looks belie a wealth of technical innovations, hidden beneath the surface. The Imagine Bi-Fold Door and French Door were designed in partnership with leading hardware manufacturer, ERA, using bespoke components to achieve the recognised PAS 24 and Secured By Design security accreditations from the day of their launch.

This commitment to future-proofing our products makes Imagine the suite of doors for discerning homeowners who want enduring safety, warmth and style for their home.

The VEKA UK Group

The beauty of in-line sliding patio doors lies in their ability to provide virtually unhindered views of the great outdoors while barely touching your living space – even when open.

The VEKA UK Group's new Imagine Patio Door builds upon these attributes with a range of technical innovations, designed to improve on everything from thermal insulation to aesthetic appearance.

An entirely flush inner frame allows the Imagine Patio Door to blend harmoniously into any room and, with a choice of 18 colour and woodgrain finishes from the Variations collection, it's easy to tailor to any design scheme. You can even opt for different colours on either side of the frame.

Two, three and four pane options are available to tailor this stylish door to any type and size of room. Homeowners can choose internal or external sliding doors and, what's more, it's possible to have multiple sliding doors.

Should your Imagine Patio Door also serve as a porch entrance to your home, the optional inclusion of a matching midrail opens up design

potential for letterplates, house numbers and other door furniture. A choice of crisply defined bevelled or softly rounded sculptured frames offers the final contemporary or traditional touch to complement your architecture.

For an even more seamless transition from in to outdoors, the Imagine Patio Door can be installed with a choice of thresholds including an exceptionally low, easy-access option – ideal for people with mobility difficulties.

This ease of access, however, does not extend to intruders! A cutting-edge multi-point locking system forms part of a formidable package of security features, making the Imagine Patio Door capable of achieving both the industry's leading security accreditations: PAS 24 and Secured By Design.

We've concentrated on the way that the doors meet one another and the frame – introducing brushes to all sides and a unique quadruple-seal interlock that keeps the warmth in and the weather out.

For all this innovation there has been no scrimping on functionality. The Imagine Patio Door is as dependably easy-to-use as you'd expect of a VEKA UK Group product.

Enjoy the best attributes of in and outdoor living with The VEKA UK Group's striking and impressive Imagine Bi-Fold Door. Representing a revolution in bi-fold design, the elegant, flush finish of the Imagine Bi-Fold Door houses a host of technical innovations, combined to create a truly world class product.

Slender sightlines allow light to fill your home whether the door is open or closed, and offer virtually unhindered views of your outdoor space.

Cast the door open for a light and airy home that gracefully unfolds into the great outdoors. The flush finish of the Imagine Bi-Fold allows its sashes to 'concertina' on themselves, effortlessly and inconspicuously stowing away using minimal space. Homeowners can even choose whether the door folds inwards or outwards.

Imagine Bi-Fold Doors can be up to six metres wide with individual sashes of up to a metre in width. An amazing 16 sash configurations lend this versatile design to virtually any home – it can even be used to separate internal areas.

Finally, a choice of 18 colour and woodgrain options further allow you to personalise the Imagine Bi-Fold Door for your home. Why not opt to use different finishes for the inward and outward-facing sides to complement your interior design scheme?

As well as letting the sunshine and fresh air flood in, Imagine Bi-Fold Doors are equally adept at keeping the cold and bad weather at bay. Their excellent thermal insulation also translates into impressive noise reduction – improved yet further with the option of triple glazing.

With ERA's bespoke hardware and multi-point locking mechanisms neatly encased in the Imagine Bi-Fold Door's frame, you can rest assured that your home is safe, sound and secure, and meets both PAS 24 and Secured by Design security accreditations.

There's a choice of three different thresholds, so you can specify the one that best suits your needs; ultra low thresholds offer easy access for people with mobility difficulties.

Each Imagine Bi-Fold Door is made-to-measure but can be assembled on site, so it can be carried through the house to reach difficult-to-access areas. This means that installation is clean, quick and hassle free.

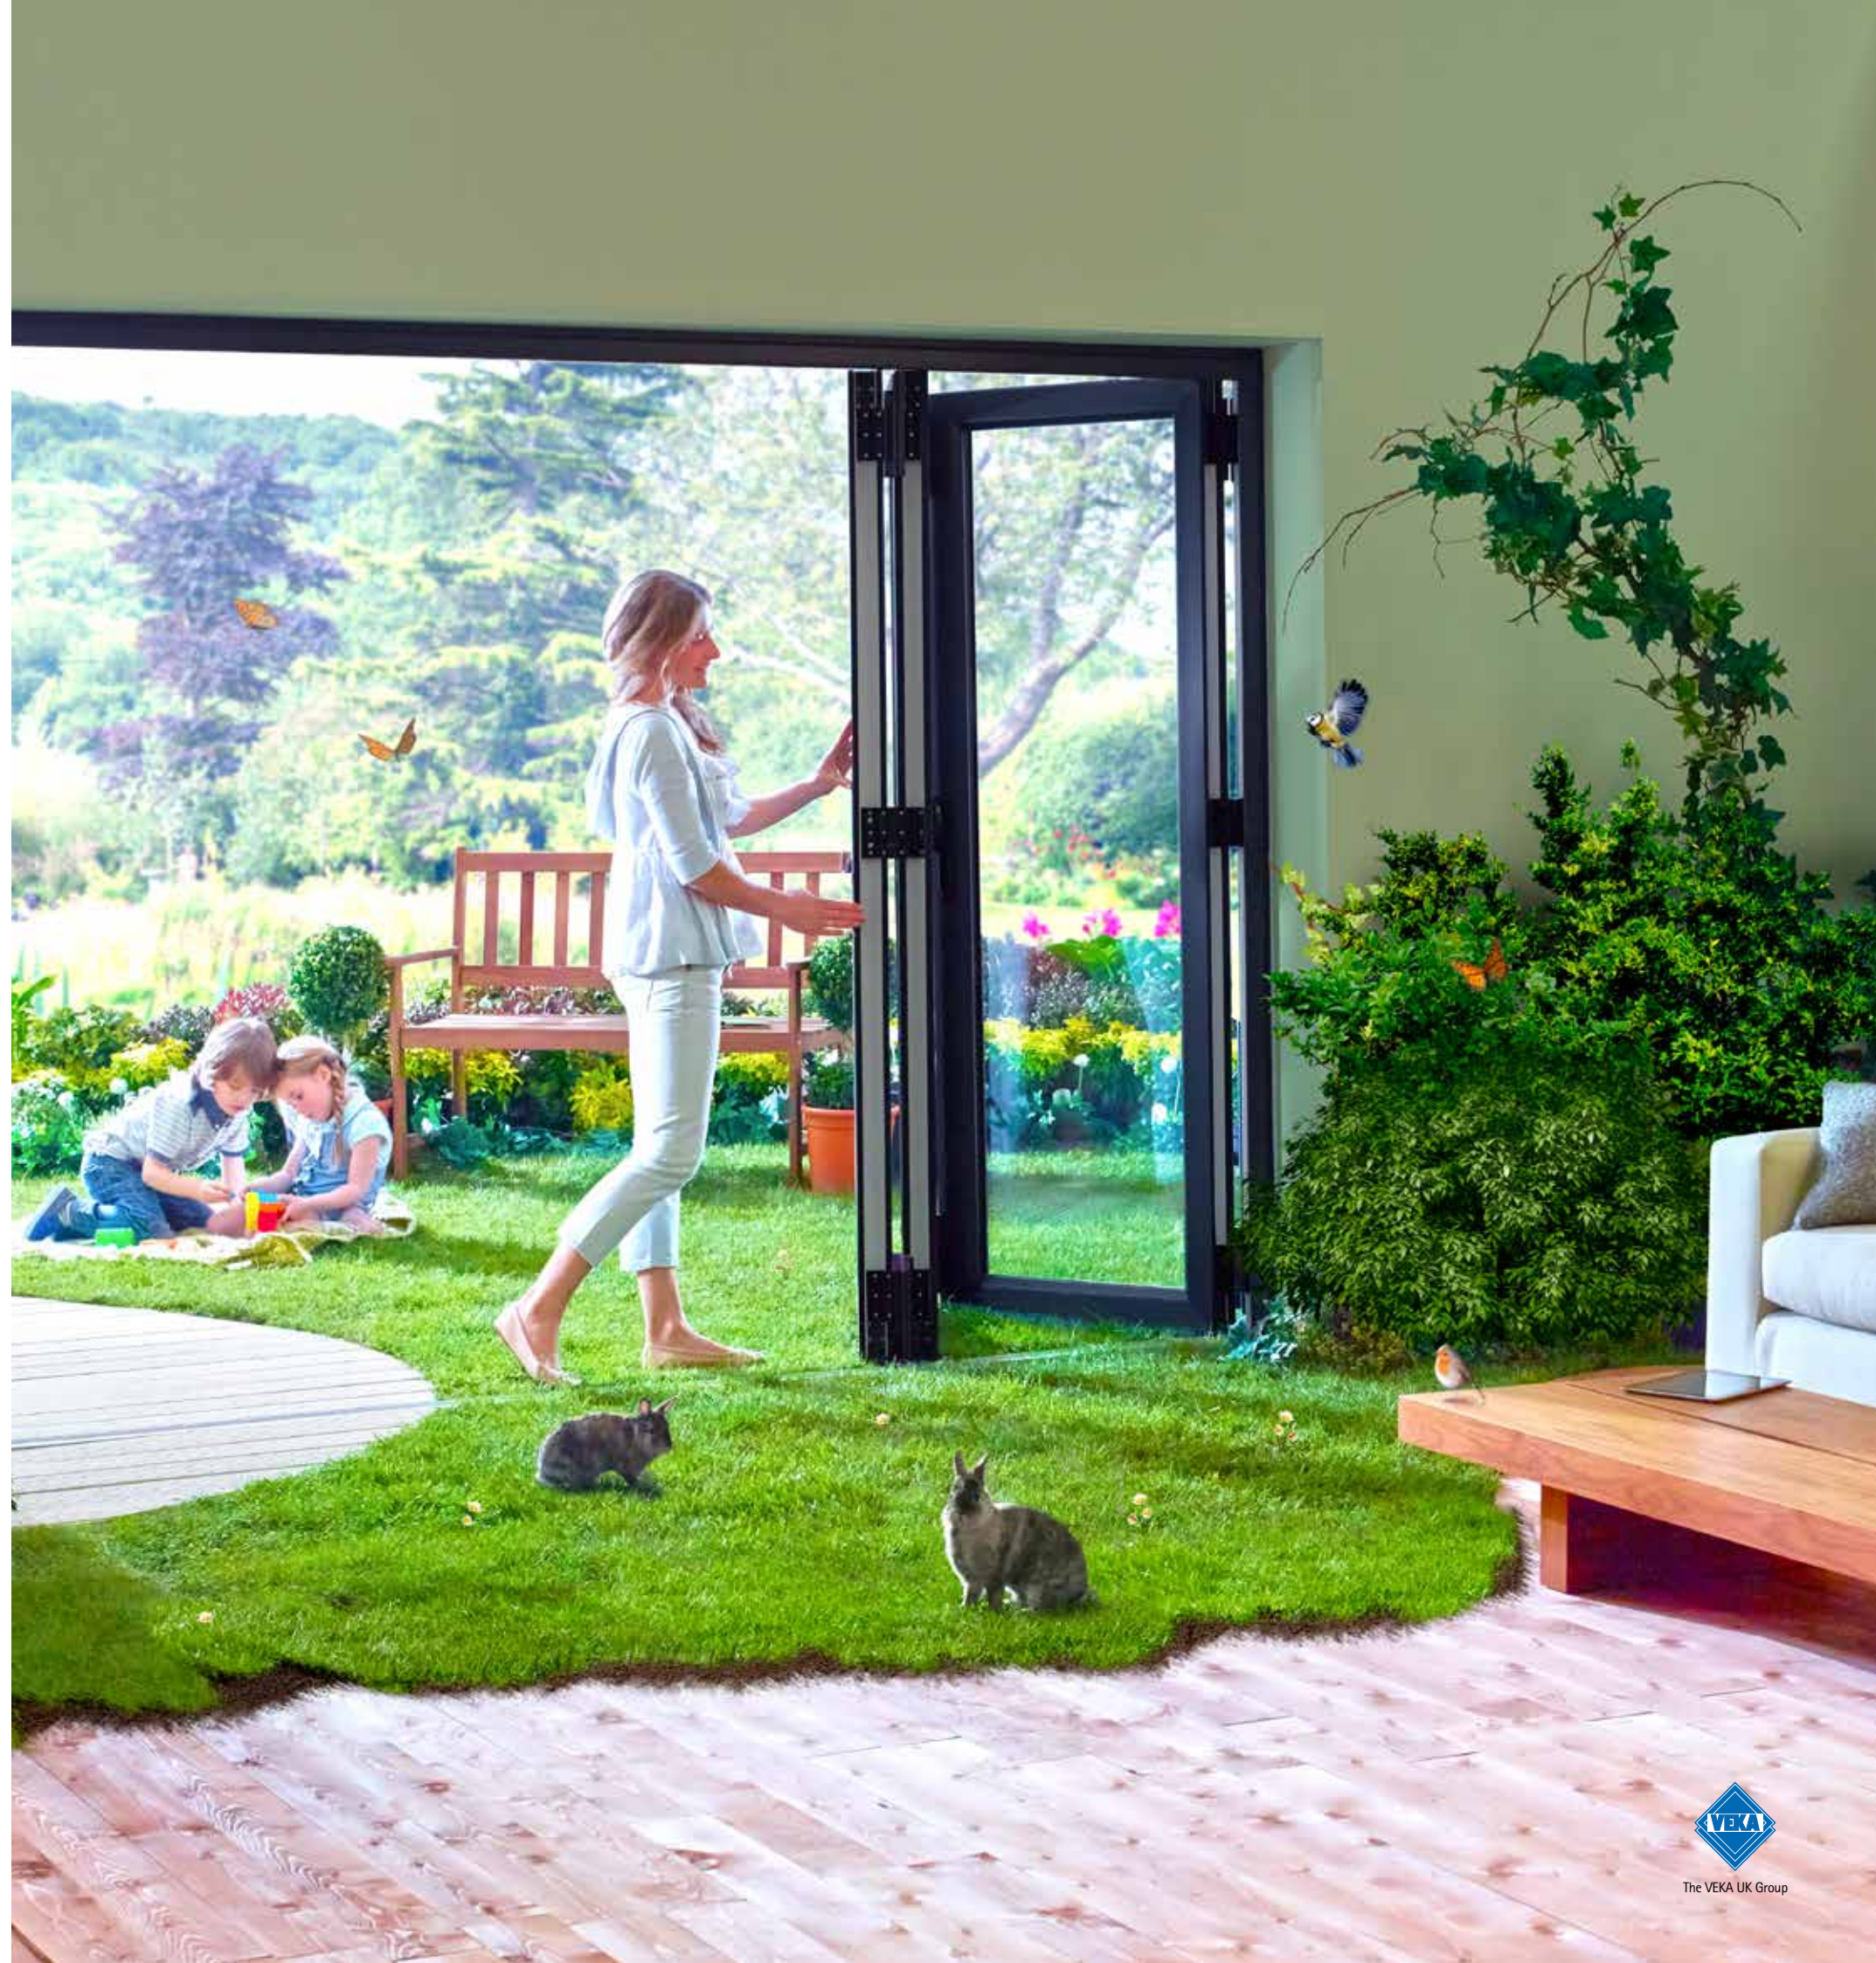

BEFORE

AFTER

The Imagine Bi-Fold Door makes an attractive alternative to a traditional sliding patio door; completely opening your home up to the garden or patio.

The VEKA UK Group

Designed without compromise, The VEKA UK Group's Imagine French Door is truly one of a kind. Its simple, elegant sightlines and flush finish encase a host of innovative technical features that result in a truly world class product.

Created in the UK for the UK market, the Imagine French Door, like its Bi-Fold counterpart, was developed alongside ERA, one of the country's top names in security and lock mechanisms. ERA's Five Star Guarantee offers homeowners significant reductions on their home insurance and a wealth of other valuable benefits including up to £5000 in compensation in the unlikely event of a break-in through an Imagine Bi-Fold or French Door. Designed to meet both PAS 24 and Secured By Design accreditations, the Imagine French Door represents a formidable barrier against intruders, even when installed with an ultra-low threshold – one of the three options available.

Compliant with Part M – the Government's guidance on Access to and Use of Buildings – the low threshold option, used with ramps, provides simple access for wheelchair users and people with mobility difficulties.

A truly versatile design, the Imagine French Door is available with a choice of bevelled or sculptured sashes and glazing beads and will accept either double or triple glazing – providing excellent thermal performance.

The extensive range of coloured and woodgrain finishes mean that you can match the French Door to existing windows, or make a striking feature of your new doors.

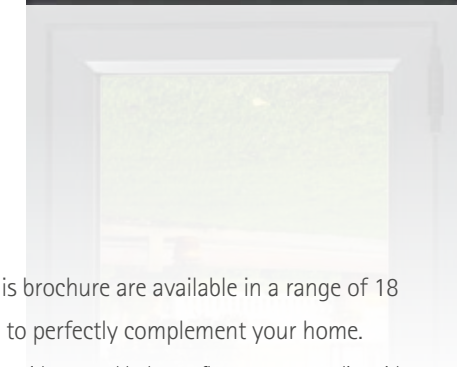

Enhance your home with The VEKA UK Group's beautiful Imagine French Door.

Homeowners can now benefit from all the technical innovations and elegant, understated styling of The VEKA UK Group's Imagine French Door in a single residential door – ideal for use as a front or back door.

With ERA's durable, bespoke-designed hardware and multi-point locks, incorporated into the frame as standard, you can rest assured that your home's entryway is safe and secure and, as with the Imagine French Door, a beautiful flush finish adds that flawless touch of class.

With three threshold levels available, the Imagine Residential Door is ideal for use as either an exterior or vestibule door. The low threshold is DDA and Part M compliant when used with wheelchair ramps and, with the option to add a central beam, the door has ample space for letter plates and other door furniture.

Pick a colour

All of the beautiful flush finish products in this brochure are available in a range of 18 colours and woodgrain options, allowing you to perfectly complement your home.

Keep it classic with cool cream or white, go contemporary with grey or black, or reflect your personality with a considered choice from our green, blue and brown hues.

If you like the look of timber, but don't want the maintenance that comes with a wooden door, check out our extensive selection of woodgrain finishes – renowned as some of the industry's most realistic. We even offer a white woodgrain option for those wanting to add a textured woodgrain effect to the popular colour choice.

Your installer can help advise you on the perfect, stylish finish for your doors and windows – but ultimately the choice is yours! Make your home as unique as you are.
